ISO 50001

Energy Management System (EnMS)

What is ISO 50001?

ISO 50001 is the international standard for Energy Management Systems (EnMS). It helps organizations systematically manage energy use, improve efficiency, cut costs, and reduce greenhouse gas emissions.

Core Elements

Energy Review & Baseline

Assess consumption and set benchmarks

Policy & Leadership

Management commitment through energy policy

Objectives & Targets

Define measurable efficiency goals

Operational Control

Ensure processes and equipment efficiency

Monitoring & Measurement

Smart meters, dashboards and audits

Design & Procurement

Renewable integration and green procurement

Continual Improvement

Regular reviews and corrective actions

Why It Matters

Lower Costs

Save money with efficient energy use

Ensure Compliance

Meet legal & regulatory requirements

Support Climate Goals

—Reduce carbon footprint and promote sustainability

Build Trust

Strengthen reputation and stakeholder confidence

Key Benefits

Lower Energy Bills

SEBI ESG/BRSSR Alignment

More Renewable Energy Use

Transparent, Auditable Reporting
